DANIEL DAYAN

JUNIOR SOC ANALYST & JUNIOR PENETRATION TESTER

Central Israel · Available immediately · Hebrew & English

054-912-0911 • **danieldayan2512@gmail.com** • **LinkedIn** • **GitHub (@0xdnd)** • **ctftracker.com** • **Portfolio (0xdnd.github.io)**

PROFILE

Junior SOC analyst and junior penetration tester. Graduate of the **Cyber Security Implementer Program at ITQ College (650 hours, Cisco and Fortinet specialization)**, where I trained on SIEM/SOC tooling (IBM QRadar SIEM, Splunk SOAR), Cisco and Fortinet. In my own Active Directory lab I practise attack paths such as Kerberoasting and BloodHound recon, and I have rooted **50+ machines across Hack The Box, TryHackMe and picoCTF**. Creator of **ZeroBox (ctftracker.com)**, an open-source pentest workspace with 4,000+ visitors. 3 years as an IDF Service Coordinator working under strict SLAs in SAP ERP and CRM ticketing systems.

TECHNICAL PROFICIENCIES

Defensive Security & SOC: IBM QRadar SIEM, WinCollect Agent, Splunk SOAR, FortiGate NGFW, Antivirus & Web Filtering, Windows Audit Policies, Syslog Forwarding, Alert Triage & Containment, Wireshark, MITRE ATT&CK Mapping.

Networking & Systems: Cisco IOS XE (VLANs, 802.1Q, OSPF, RIPv2, HSRP, GRE & IPsec VPNs, ACLs, NAT, Port Security), Windows Server 2022 (AD / GPO), DNS / DHCP, LPI Linux Essentials, Kali & Ubuntu (tcpdump, SSH, Netplan), VMware.

Offensive Security & Pentesting: Nmap, Burp Suite, OWASP ZAP, OWASP Top 10, ffuf, SQLMap, Metasploit, Hydra, Hashcat, Privilege Escalation, Kerberoasting, BloodHound, CVSS v3.1.

Scripting & Operations: React, TypeScript, Python, Bash, PowerShell, SQL, Git, SAP ERP Workflows, CRM Ticket Triage.

PROJECTS & HOMELAB

ZeroBox (ctftracker.com) — CTF Tracker & Penetration Testing Workspace — Open Source

Creator | 4,000+ visitors | github.com/0xdnd/ctf-tracker

- Offline-first workspace in React and TypeScript, shipped as a web app and a Tauri desktop app: a **1,000+ machine catalog**, **131 reverse shell templates** and an 8-phase methodology.
- Multi-host Nmap XML importer with one-click attack graphs, a masked credential and hash vault, and a CVSS v3.1 Markdown report generator.
- Timed exam simulator (OSCP, CRTO, OSEP, CRTP) with ZIP submission export. Runs fully offline with no accounts and no cloud telemetry; data stays in the browser (IndexedDB / LocalStorage).

Active Directory Homelab — Personal Lab

- Built an Active Directory domain with **two domain-joined Windows machines**, plus a **Linux VPN server** for remote access to the lab.
- Practise AD attack paths end to end, including **Kerberoasting** and **BloodHound recon**.

TRAINING & OFFENSIVE PRACTICE

Cyber Security Implementer Program, ITQ College — 2024 – 2025

650 hours | Cisco & Fortinet Specialization | Completed alongside the final year of IDF service (IDF-funded civilian program)

- **Cisco IOS XE** routers & switches: VLANs and 802.1Q trunking, inter-VLAN routing, DHCP, OSPF, RIPv2, HSRP, ACLs, port security, NAT, and GRE and IPsec VPN tunnels.
- **FortiGate NGFW**: configured for a simulated two-site enterprise network (Israel and USA): firewall policies, Virtual IPs (static NAT), antivirus and web filtering profiles, and a site-to-site IPsec VPN.
- **Windows Server 2022 & Linux**: Active Directory, Group Policy (GPO), NTFS permissions, DHCP with MAC filtering; studied LPI Linux Essentials and administered Kali and Ubuntu.
- **IBM QRadar SIEM & Splunk SOAR**: configured QRadar SIEM with the WinCollect agent, Windows audit policies, and syslog forwarding through the FortiGate, and set up Splunk SOAR.

CTFs & Hack The Box Academy — Ongoing

- **50+ machines rooted** across Hack The Box, TryHackMe and picoCTF, including **2 active-season HTB machines** (Reactor & Kobold); **30 HTB Academy modules** completed (AD, web exploitation & post-exploitation).
- **TwoMillion** (HTB): API enumeration, admin via API, command injection in the VPN generator, CVE-2023-0386 OverlayFS kernel privesc. **Blue** (HTB): MS17-010 EternalBlue, SMBv1 (srv.sys) RCE to SYSTEM.
- **Cap** (HTB): IDOR on PCAP export, plaintext credential sniffing, Python cap_setuid privesc. **Support** (TryHackMe): web app pentest from vulnerability discovery to remote code execution.
- Currently learning: HTB Academy CPTS and CWES paths.

MILITARY SERVICE

Service Coordinator, Soldier Benefits — Israel Defense Forces (IDF) — 2022 – 2025 (3 Years)

- Investigated and resolved hundreds of sensitive soldier entitlement cases in SAP, maintaining strict data confidentiality and high accuracy under daily SLAs.
- Prioritized and tracked complex escalations through CRM and ticketing workflows, writing clear case notes that sped up coordination between soldiers, commanders and external agencies.

EDUCATION

High School Diploma, Computer Science Major (10 Units) — 2020 – 2022

Final graduation project: native Android app in Java for real-time cryptocurrency prices and currency conversion (USD/EUR/ILS); web development with HTML and CSS.
